### Portfolio profile

This portfolio is suitable for investors who aim to maximise interest income, preserve capital and have same day liquidity. The portfolio maintains a certain minimum of assets in liquid form as determined by the manager from time to time and aims to generate high levels of income, preserve capital, and provide same day liquidity by investing in money market instruments which are issued by large international banks or corporates with an international rating of A- or better.

### Maturity spread

Maturity spread	% Spread
0 - 3 months	47.8%
3 - 6 months	33.6%
6 - 13 months	18.6%
<b>Total</b>	<b>100.0%</b>

### Portfolio structure

<sup>1</sup> Total Expense Ratio (TER), expressed as a percentage of the Fund, relates to expenses incurred in the administration of the Fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs (TC), expressed as a percentage of the Fund, relate to the costs incurred in buying and selling the underlying assets of the Fund. TC are a necessary cost in administering the fund and impact fund returns. It should not be considered in isolation as returns may be impacted by other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The Total Investment Charges expressed as a percentage of the Fund, relates to all investment costs of the Fund. Calculations are based on actual data where possible and best estimates where actual data is not available. Both the TER and TC of the Fund are calculated on an annualised basis, however these cannot be determined accurately because the Fund was recently launched and has a short track record.

## Portfolio attributes

A South African money market fund which aims to preserve capital, and provide an attractive alternative to saving deposit accounts, by investing in money market instruments which are issued by large international banks or corporates.

Key characteristics of the fund:

- Attractive yields compared to cash deposits\*
- Daily liquidity
- Diversification across counterparties

## Investment manager

Taquanta is one of a few specialist cash and fixed income asset managers in South Africa. Their fixed income team, consisting of former treasury professionals whose skills are clearly differentiated from generic cash and fixed income asset managers, is amongst the top ranked cash managers in the country from a consistency and risk adjusted return perspective.

The fixed income team at Taquanta manages Nedgroup Investments range of Money Market funds, as well as the Core Income Fund.

## Investment philosophy

The investment process is built on the premise of capital preservation from which all key risk drivers are managed to achieve the Nedgroup Investments Money Market Fund's object through different investment cycles. The investment manager will endeavour to unlock the liquidity risk premium embedded in money market assets via the structuring and purchasing of assets that will create yield enhancement over the life of the asset within the fund.

\* Please note that Money Market Funds are not risk free and are also not bank deposit accounts. Please refer to the Frequently Asked Questions document on the Money Market Fund's webpage.
